47

EXAMPLE QUESTION 3

48

48

Put these sentences about the Empire Plaza in the best order.

1. The massive undertaking used 232,000 tons of steel, 900,000 cubic yards of concrete, and 40,000 tons of marble, and expended 1.7 billion in 1970s dollars, leading to the popular joke that the governor had an "edifice complex", though not all commentators were so waggish.
2. As the governor remarked: "There's no question that the city did not look as I think the Princess thought it was going to."
3. Governor Nelson A. Rockefeller formulated his plans to build what is now the Empire Plaza in the wake of a diplomatic visit by Princess Beatrix of the Netherlands that highlighted the dilapidated condition of much of the city.
4. One biographer wrote: "In a deeper sense, art and architecture have a much more intimate relationship. For him, art and architecture often blurred, and there is no doubt that on one plane of consciousness, Rockefeller perceived the outer shell of buildings as sculpture. The Mall here in Albany, for instance, can be characterized as a group of forms on a platform – sculpture on a pedestal, if you will."
5. His attempt to improve the city's looks, however, met with a great deal of criticism due in large part to the effort's gargantuan scope and budget.
